

DWM NAMED IMPACTASSETS GLOBAL TOP 50 IMPACT INVESTMENT MANAGERS

June 15, 2011 – Developing World Markets (DWM) was named a leading impact investment manager on the *ImpactAssets 50* - a global index of the top 50 private investment managers that deliver social and environmental value in addition to financial returns. DWM was recognized for its success in harnessing the capital markets to sustainably finance microfinance opportunities in developing markets.

ImpactAssets 50 is the first “open source” publicly published list of private debt and equity impact investment fund managers. Providing financial and impact information on each manager, the database is searchable by asset class, impact focus, assets under management and geography. ImpactAssets 50 is part of a broader initiative by the Cordes and Calvert Foundations to create a comprehensive impact investment platform, with a goal of unleashing \$2 billion of new capital to help solve the world's most pressing challenges by 2016.
